

Github Repository Instructions

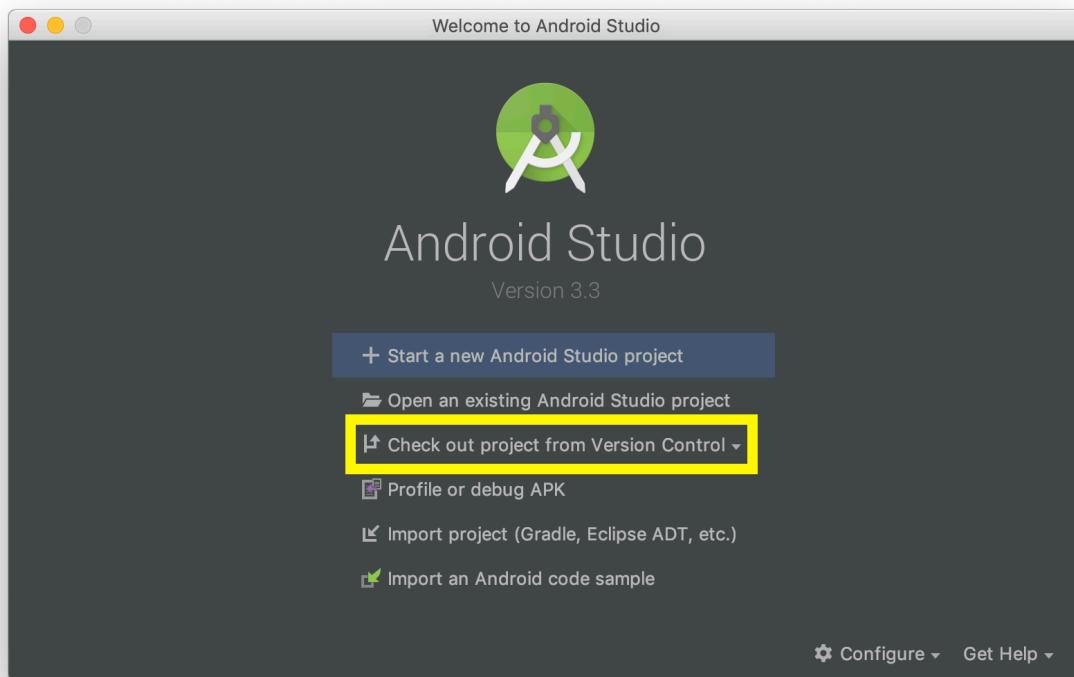

Jaineek Parikh, Zhenmu Gong, Canyu Yang, Wynn Smith, Lucas Hall, Aakash Patel

How To Clone the Project

Download and install Android Studio for your device. Start Android Studio. You will be greeted by this screen.

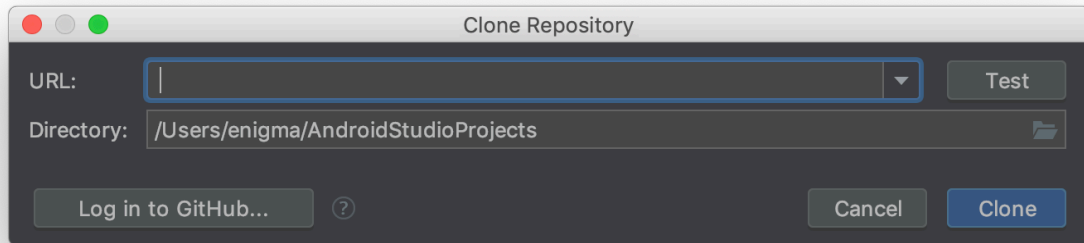

Click on 'Check out project from Version Control' highlighted below.

Then click on 'git' from the sub-menu.

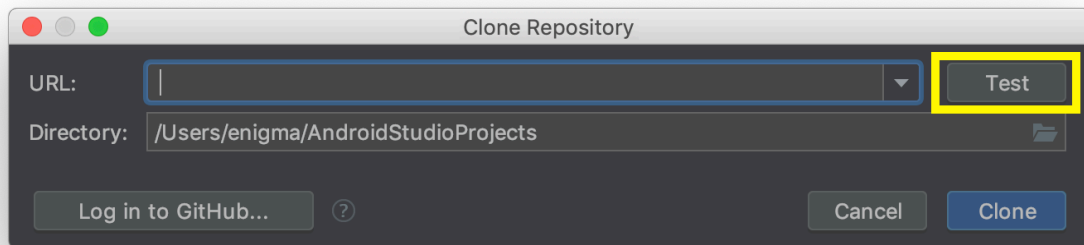

You will then see the screen below.

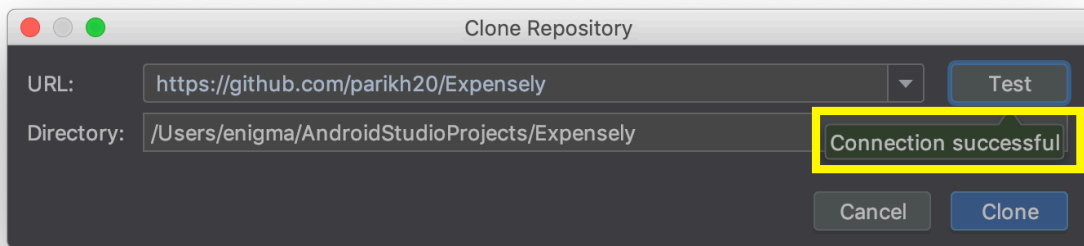

Click 'Login to Github' and then proceed to login to your Github account. In the 'URL' section, copy and paste <https://github.com/parikh20/Expensely> in.

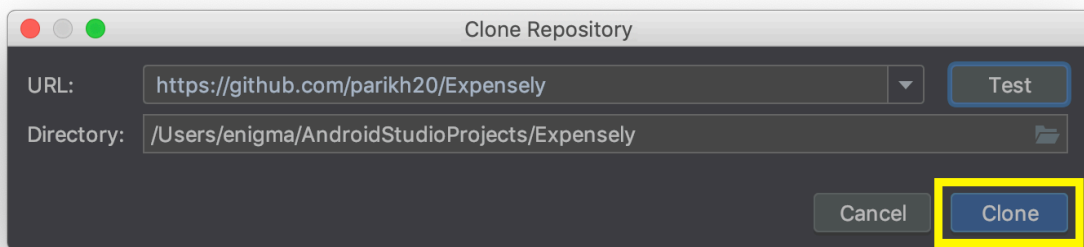

Once logged in and the 'URL' textbox is filled with the link to the repository, click on 'Test.'

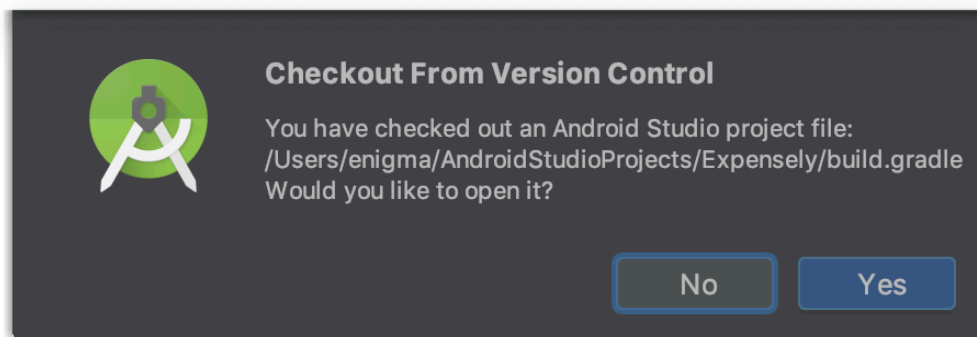

If the program says 'Successful', then you may proceed. If not, then something has gone wrong and you must repeat the previous steps correctly.

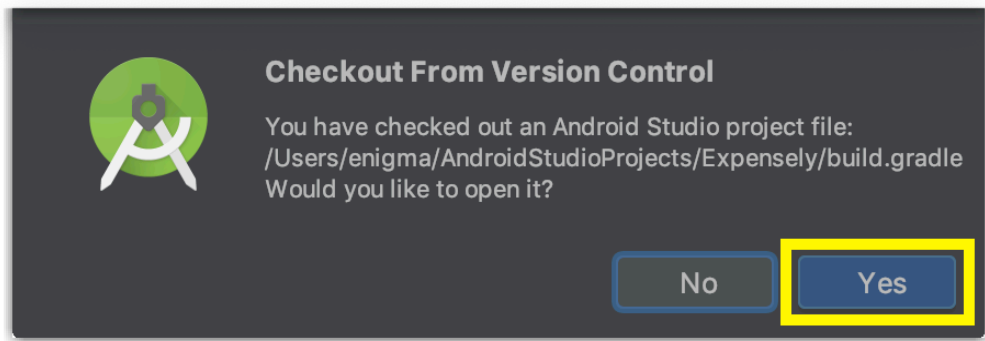

Then click 'Clone'.

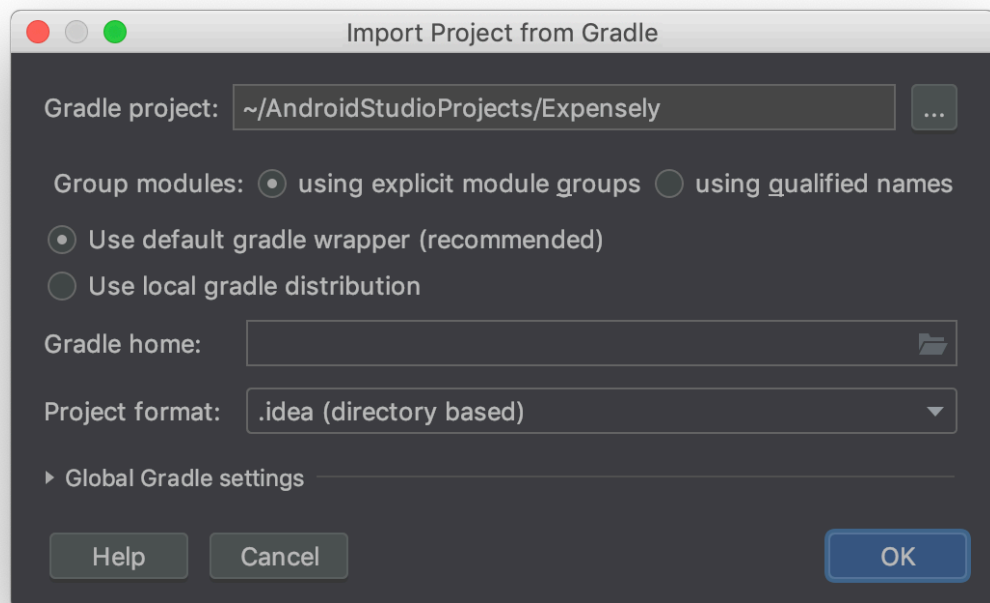

You will then see this screen.

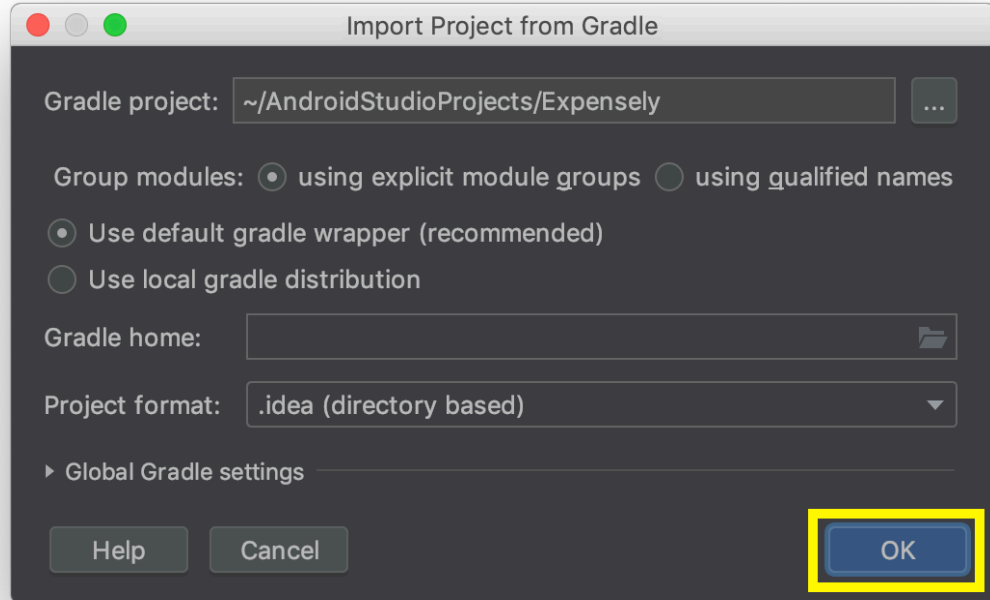

Click 'Yes'.

The following screen will then show up.

Click 'OK'.

The project has now been cloned. More instructions will follow on how to build and run the app.
